

Liability Management at its best

Sovereign

RISK SOLUTIONS LTD

about our company

Sovereign Risk Solutions Ltd serves the UK insurance industry by providing general and specialist technical liability risk management, targeted to reduce losses.

By utilising highly qualified and experienced assessors and providing an exceptional level of service SRSL are highly rated by our clients.

In today's climate of escalating civil liability claims, increasing numbers of aggressive no-win-no-fee legal companies, increased numbers of successful health and safety prosecutions and the subsequent rising insurance premiums, the effective management of business liability risk is vital for both insurers and assureds.

Clients benefit from effective liability risk management through reduced premiums, improved bottom line profits and in extreme cases the avoidance of closure or saving of lives.

SRSL's record of reducing claims ratios are exemplary. Our liability managers are highly qualified to degree level and have many years of experience in the field.

A full range of services are available from health & safety audits, strategies and training, insurance surveys, environmental protection and improvement management and we are able to operate nationwide and internationally from our three regionally based offices in the UK.

Our client base covers large and small companies across all industry sectors.

“Since working with SRSL, we have reconsidered the management issues of our contract site operations. They have helped us to raise our profile and service and helped us develop a longer term insurance relationship.”

SRSL are experienced in a wide range of industries including Construction, Haulage, House Build, Manufacturing and Retail.

dedicated services

The following services are available to our clients, delivered by our team of qualified industry trained and experienced professionals and backed by comprehensive administration support.

Our normal service level for surveys from instruction to report delivery is 10 days, however shorter turn around times are available by request. Prices vary dependant on service.
